INDEX TO VOLUME V[1]

Absorption ratios of biological stains 65
Acetic methyl green 117
Aceto-carmin 117
Acid fuchsin 2, 3, 4, 7, 8, 9, 10, 32, 35, 36, 38, 62, 67, 69, 99, 111, 122, 123, 124, 127, 153, 155, 156
  with methyl green 152
Acid violet 123
Alizarin 68, 112, 119, 123
  molybdic acid lake 112
Alizarin red S 68
Amaranth 67
Ambrogi, L. P. Rapid paraffin embedding method. (abs.) 34
Analysis of neutral red and of pyronins 91
Anilin blue 3, 4, 5, 6, 7, 10, 32, 68, 109, 154
  orcein, Unna's 155
Anilin brown 43
Anilin dyes in histology, history of 3
Anilin purple 3
Anilin red 4, 5
Anilin violet 3, 4
Aoyama, Fumio. Eine Modifikation der Cajakschen Methode zur Darstellung des Golgischen Binnenapparates. (abs.) 75
Application of dyes in the cancer problem 49
Auramin 67
Azures 62, 81, 84, 89, 123, 128, 130, 131, 132, 133
Azure-eosin 61, 62, 131

Bacteria, negative staining of 25
Bacteriological staining methods, development of 39
Bacteriostatic work, dyes for 1
Bailey, H. D. A flagella and capsule stain for bacteria. (abs.) 109
  A practical flagella and capsule stain for bacteria. (abs.) 151
Band, Marie; Helen H. Owen and. The Stoltenberg differential stain for diphtheria bacilli. (abs.) 112
Basic fuchsin 2, 3, 4, 5, 6, 7, 31, 33, 36, 40, 43, 44, 45, 47, 62, 69, 79, 99, 101, 102, 113, 114, 116, 120, 133, 151
  for staining vascular bundles 99
Beers, C. D. The preparation of permanent slides of the rhizopod Arcella. (abs.) 151
Behavior of sudan III when fed with carbohydrate. (abs.) 153
Beitrage zur Färbung der Paschenschen Körperchen (Elementarkörperchen). (abs.) 115
Benda's light-green-safranin 123
Benzyl violet 68, 70
Biebrich scarlet 67
Bismarck brown 40, 44, 46, 67, 109
Blood films, combined peroxidase Wright's stain for 101
Block staining of nervous tissue with silver. Studies of fixatives, lipid solvents, and reducing solutions 139
Blood staining, history of 127
Bordeaux B 67
Brice, Jr., Arthur T. Note on a combined peroxidase Wright's stain for blood films 101
Brief method for demonstration of mucin. (abs.) 31
Brilliant cresyl blue 2, 38, 68, 79, 133
Brilliant green 1, 36, 68
Brilmyer, G. J. Combining a nuclear and differential tissue stain. (abs.) 32
Bubenaite, J. Über einige Erfahrungen mit der Golgi-Methode. (abs.) 75
Buffers, use in H-ion control of staining procedures 87

Cajal fiber stain 144
Campbell, Helenor. Stain for *B. leprae* and myelin sheath. (abs.) 33

[1]A complete index of Volumes I to V will be included with the first number of Volume VI (Jan. 1931).

Cancer problem, application of dyes in 49
Cancer research 77
Capri blue GON 68
Carbol fuchsin 45, 109, 115, 151
Carbol-methyl-violet 45
Carmin 4, 5, 6, 31, 35, 40, 75, 79, 109, 111, 112, 118, 119
aceto- 112, 117
borax 111
glycerin 119
Grübler's "rubrum opticum" 112
HCl-glycerin- 39, 40
picro- 117
Cartwright, K. St. G. A satisfactory method of staining Fungi mycelium in wood sections. (abs.) 109
Chase, W. H. Rapid frozen section method for fresh tissues. (abs.) 33
Chemistry of dyes, research on 37
Christeller, E. and K. Kaiser. Microchemical histological method for differentiation of tissues by means of ferric salts formation. (abs.) 31
Chrome black F 68
Chrysoidin R. and Y 67, 70
Clauser, F. and Strani, M. Primäre Färbung durch Chloroform and saure Farbstoffe. (abs.) 109
Combining a nuclear and differential tissue stain. (abs.) 32
Congo red 9, 49, 63, 67, 79
Conn, H. J.
Progress in the standardization of stains:
Cancer research 77
Dyes for bacteriostatic work 1
Research on chemistry of dyes 37
The history of staining:
Anilin dyes in histology 3
Development of bacteriological staining methods 39
The staining of blood and parasitic protozoa 127
Connective tissue, new differential staining method, combined with ordinary hematoxylin-eosin 73
Cresyl blue 152
Cresyl echt violet 66, 68
Cresyl violet NAC 68, 69
Crowell, Ivan H. Cutting microscopic sections of wood without previous treatment in hydrofluoric acid 149
Crystal ponceau 67
Crystal violet 1, 3, 31, 32, 36, 38, 68, 70, 71, 79, 111, 123, 133, 156
Culture d'un Saprolegnia en milieux nutritifs additionnés de colorants vitaux. Valeur de la methode des colorations vitals. (abs.) 152
Cutting microscopic sections of wood without previous treatment in hydrofluoric. 149
Cytological staining, history of 117

Dahlia 5, 6, 7, 121, 133
Davenport, H. A. Block staining of nervous tissue with silver 139
Silver impregnation of nerve fibers in celloidin sections. (abs.) 110
Davies, J. I. A method of orienting difficult embryological material for sectioning. (abs.) 75
Decolourization of tubercle bacilli in sections at low temperatures. (abs.) 33
Delafield's hematoxylin 119, 135, 136, 138, 151
Destaining agent, picric acid, for iron alum hematoxylin 135
Detecting oil in twigs 29
Development of cytological staining 117
Diagnosis of fresh tissue in the operating room 81
Diamond flavine 67
Dibromofluorescein 67
Die Verwendung der Gefriermethode bei Pflanzlichen Objecten. (abs.) 34
Differential staining method for connective tissue combined with ordinary hematoxylin-eosin 73
Differentiation, safranin, new method for 103

Dorner, W. Ch. Negative staining of bacteria 25
Doubrow, S. and Rousset, J. Sur un procédé de technique histologique concernat la coupe en série des petits Nématodes. (abs.) 76
Duff, D. C. B. A modification of the Orskov single-cell technic. (abs.) 110
Dyes, application in the cancer problem 49
Research on chemistry of 37

Eosin A. G 152
Eosin B 13, 14, 15, 67, 69, 73, 155
Eosin-methylene-blue 127, 128
Eosin Y . . 2, 3, 5, 6, 7, 8, 18, 19, 21, 22, 31, 34, 35, 43, 46, 61, 67, 71, 75, 79, 81, 83, 84, 89, 109, 111, 113, 114, 121, 123, 127–131
Erie garnet B 81, 84
Erythrosin 2, 33, 67, 69
Ethyl eosin 67
Ethyl violet 68
Executive committee, new member of 78

Fast green FCF 68, 69, 107, 123
Fast red A 67
Fiala, Grace F. Preparation of hair for cross section examination. (abs.) 110
Fiber stain, Cajal's 144
Fixative, gelatin, for paraffin sections 97
Fixatives, in block staining of nervous tissue with silver 139
Fixing thin blood smears for staining with iron hematoxylin and with Giemsa's stain. (abs.) 113
Flagella and capsule stain for bacteria. (abs.) 109
Flemming's fluid 120
Flemming triple stain 122
Fluorescein 67
Foley, J. O. Studies in stain technique. Cytological staining with Auerbach's methyl green-acid fuchsin mixture. (abs.) 151
French, R. W. Practical methods for the control of Hydrogen-ion concentration in staining procedures—The use of "buffers" 87
Fresh tissue diagnosis in the operating room 81
Fuchsin, acid 2, 3, 4, 7, 8, 9, 10, 32, 35, 36, 38, 62, 67, 69, 99, 111, 122, 123, 124 127, 153, 155, 156
with methyl green 152
Fuchsin, basic 2, 3, 4, 5, 6, 7, 31, 33, 36, 40, 43, 44, 45, 47, 62, 69, 79, 99, 101, 102, 113, 114, 116, 120, 133, 151
Fuchsin, carbol 45, 109, 115, 151
Fulton, J. D.; J. Gough and. New fixative for mitochondria. (abs.) 36
Further experimentation with new differential staining method for connective tissue combined with ordinary hematoxylin-eosin stain 73

Gelatin carmin injections. (abs.) 35
Gelatin fixative for paraffin sections 97
Gentian violet 9, 36, 40, 44, 45, 79, 109, 122
Geschickter, Charles F. Application of dyes in the cancer problem 49
Fresh tissue diagnosis in the operating room 81
Giemsa stain 49, 51, 58, 61, 62, 87, 89, 90, 113, 123, 131, 132, 133
Gold orange 152
Gough, J. and J. D. Fulton. New fixative for mitochondria. (abs.) 36
Gourley, J. H. Basic fuchsin for staining vascular bundles 99
Gram stain 46, 47, 111
Gram stain: a quick method for staining Gram positive organisms in tissues. (abs.) 111
Guilliermont, A. Culture d'un Saprolegnia en milieux nutritifs additionnes de colorants vitaux. Valeur de la méthode des colorations vitals. (abs.) 152
Guinea green B 68

Haupt, Arthur W. A gelatin fixative for paraffin sections 97
Haynes, Rachel. Detecting oil in twigs 29
Haythorn, A. R. Decolourization of tubercle bacilli in sections at low temperatures. (abs.) 33
Haythorn, S. R. Hematoxylin erythrosin Gram-Weigert stain. (abs.) 33

Hemalum, Mayer's 13, 14, 15, 30
Hematein 2, 13, 14, 73, 79, 98, 152
advantages for general laboratory usage 13
Hematoxylin 6, 9, 13, 14, 30, 32, 33, 34, 35, 36, 38, 39, 40, 61, 75, 79, 81, 83, 84, 113, 119, 121, 123, 128, 135–138, 151, 153, 154
Benda's 119
Delafield's 73, 119, 135, 136, 138, 151
Ehrlich's 119
Heidenhain's 58, 61, 62, 119, 135, 151
iron 113, 119
iron alum 135
Mallory's 119
picro- 138
Weigert's 119
Hematoxylin-eosin stain, combined with differential staining method for connective tissue 73
Hematoxylin erythrosin Gram-Weigert stain. (abs.) 33
Histology, anilin dyes in, history of 3
History of staining:
Anilin dyes in histology 3
Development of bacteriological staining methods 39
Development of cytological staining 117
Staining of blood and parasitic protozoa 127
Holmes, W. C. and A. R. Peterson. Absorption ratios of biological stains 63
The analysis of neutral red and of the pyronins 91
Hubin, Marguerite. Un procédé rapide de triple coloration. (abs.) 152
Hydrogen-ion concentration, use of buffers for control in staining procedures 87

Impregnation, silver 139–147
India ink 25, 26, 111
Indigo 50, 119
carmin 35, 38, 107, 112
Indigotin 68, 71
Indulin 112
Ingelby, H. Modification of Achucarro's method of staining neuroglia. (abs.) 32
Iodine green 43
Iodine violet 7
Iris violet 68
Iron hematoxylin 30, 119, 135, 151, 153
Iron alum hematoxylin 135
picric acid as destaining agent for 135

Janus green B 68, 124, 133, 152
Janus red 67
Jenner's stain 129

Kaiser, K.; E. Christeller and. Microchemical histological method for differentiation of tissues by means of ferric salts formation. (abs.) 31
Kisser, J. Die Verwendung der Gefriermethode bei Pflanzlichen Objecten. (abs.) 34
Knower, H. McE. A rapid method for staining sections of the spinal cord and brain stem. (abs.) 153
Kornhauser, S. I. Hematein—Its advantages for general laboratory usage 13
History of staining. The development of cytological staining 117

Larson, Edith E. Further experimentation with a new differential staining method for connective tissue, combined with the ordinary hematoxylin-eosin stain .. 71
Lieshmann stain 130
Liengme, A. Modification de la methode de coloration nucleaire en masse de Moret et Bassal. (abs.) 153
Light green SF yellowish 9, 36, 68, 112, 123, 154
Light-green-safranin, Benda's 123
Lilac anilin 3
Lillie, R. D. Brief method for demonstration of mucin. (abs.) 31
The Gram stain: A quick method for staining Gram positive organisms in tissues. (abs.) 111

Lipid solvents, in block staining of nervous tissue with silver 139
Lithium carminate 111
Localizing inorganic substances in microscopic sections. The micro-incineration method. (abs.) 113
Logwood extract 43, 46
Lucas, M. S. Method for concentrating and sectioning protozoa. (abs.) 76
Lynch, J. E. Eine neue Karminmethode für Totalpraparate. (abs.) 111
Lyons blue 112

MacArthur, E. H. The behavior of sudan III when fed with carbohydrate. (abs.) . 153
MacNeal's tetrachrome stain 131, 132
Magdala red 68, 121
Magenta II 66, 67
Malachite green 68, 107, 113
Martius yellow 67
Mauve 3, 7
May-Grünwald stain 129, 132
Mechanism of staining explained on a chemical basis. II. General presentation ... 17
Meldola's blue 68
Mercurochrome 67
Method for concentration and sectioning protozoa. (abs.) 76
Method for staining of polar bodies. (abs.) 116
Method of orienting difficult embryological material for sectioning. (abs.) 75
Methyl blue 68, 109, 152
Methyl eosin 67, 153
Methyl green 3, 6, 8, 36, 38, 43, 63, 68, 71, 79, 117, 122, 124, 133
with acid fuchsin 152
Methyl orange 67
Methyl violet 1, 3, 6, 7, 40, 43, 44, 45, 47, 68, 69, 115, 133, 152
Methylene azure 130, 131
Methylene blue 3, 8, 9, 18, 19, 29, 35, 38, 44, 45, 46, 47, 50, 61, 68, 69, 70, 71, 89, 92, 113, 114, 115, 123, 127, 128, 129, 130, 131, 132
eosinate 127, 128, 132
Loeffler 113
polychrome 83, 114, 128
silicate 18
Methylene green 68, 69
Methylene violet (Bernthsen) 8, 68, 69, 130, 131
Methylene violet 2 R 67
Metodi rapidi di colorazione dei corpi del Negri. (abs.) 34
de Meyere, J. C. H. Über haltbare rasche Färbung vermittels Azetokarmin. (abs.) 112
Microchemical histological method for differentiation of tissues by means of ferric salts formation. (abs.) 31
Modification de la méthode de coloration nucléaire en masse de Moret et Bassal. (abs.) 153
Modification of Achúcarro's method of staining neuroglia. (abs.) 32
Modification of the Orskov single-cell technic. (abs.) 110
Modifikation der Cajakschen Methode zur Darstellung des Golgischen Binnenapparates. (abs.) 75
Moore, R. A. Gelatin carmin injections. (abs.) 35
Mucicarmin 63

Naphthol green B 92, 94
Narcein 69
Negative staining of bacteria 25
Nervous tissue, block staining with silver 139
Neuartige Anwendung des Pasinischen Farbengemisches zur feineren Untersuchung des Bindegewebes. (abs.) 155
Neue Karminmethode für Totalpraparate. (abs.) 111
Neutral red 67, 79, 91, 92–96, 111, 124, 133, 152
iodide 96
and pyronins, analysis of 91
Neutral violet 67, 133
New fixative for mitochondria. (abs.) 36

New fuchsin 68
New member of Executive Committee 78
New method for safranin differentiation 103
New methylene blue N 68
New rapid method for tissue sections. (abs.) 115
Niagara sky blue 68
Night blue 68
Nigrosin 25, 26, 27, 68, 156
Nile blue 68, 69, 152
Notes on a combined peroxidase Wright's stain for blood films 101
Notes on technic:
  Detecting oil in twigs 29
  Mayer's hemalum, correction 30
  Wire holder for staining slides 29

Oil, detecting in twigs 29
Okada, S. Über eine neue Silberimpregnationsmethode zur Darstellung der Neurofibrillen. (abs.) 36
Okajima, K. Über die Färbemethode mit Alizarinmolybdänlack. (abs.) 112
Okkels, H.; A. Policard and. Localizing inorganic substances in microscopic sections. The microincineration method. (abs.) 113
On the influence of electric polarization upon the stainability of nerve. (abs.) 154
On the real nature of vital staining. (abs.) 111
On the staining capacity of the nucleolus and its physiological significance. (abs.) 154
Orange 9, 43, 122
Orange G 3, 9, 10, 31, 32, 33, 67, 73, 74, 109, 122, 154, 156
Orange yellow 111
Orange I, II, and IV 67
Orcein 155
Owen, Helen H. and Band, Marie. The Stoltenberg differential stain for diphtheria bacilli. (abs.) 112

Pappenheim stain 10, 132
Paraffin sections, gelatin fixative for 97
Pararosanilin 7, 67, 70
Parme blue 4, 7
Paris blue 4
Peroxidase Wright's stain for blood films 101
Peterson, A. R.; W. C. Holmes and. Absorption ratios of biological stains 63
  The analysis of neutral red and of the pyronins 91
Petragnani, G. Metodi rapidi di colorazione dei corpi del Negri. (abs.) 34
Phenosafranin 31, 67
Phenyl rosanilins 7
Phloxine 67, 69
Picric acid 9, 69, 103, 104–107, 109, 112, 120, 123, 135–138, 153
  as a destaining agent for iron alum hematoxylin 135
Picrocarmin 6, 117
